Program overview

Vision: Improved health care services through quality education of health professionals

Mission: To produce educational leaders that are going to bridge the gap in medical education, between national and international contexts on one hand and work collaboratively as teams of health professions educators on the other hand to raise the quality of health care services.

Program outcomes:

The graduates will be able to

- Perform their roles as effective educators by planning, facilitating and assessing learning based on sound educational principles
- Critically appraise and generate evidence that will guide educational practice
- Lead change at institutional and national level
