

**Dr. Farhan Ullah**

**Associate Research Professor | Cybersecurity Specialist  
Researcher Cybersecurity Center, Prince Mohammad Bin Fahd University  
Arabia**

**Department of Computer Science**

## BIO

Dr. Farhan Ullah is an accomplished researcher and academician specializing in cybersecurity, artificial intelligence, and deep learning. Currently serving as an Associate Research Professor at the Cybersecurity Center of Prince Mohammad Bin Fahd University, he has made significant contributions to the fields of malware detection, secure computing, and federated learning. With over 75 SCI/impact factor publications and a strong citation record, his work is recognized globally for its impact on AI-driven cybersecurity solutions. Previously, Dr. Farhan held faculty positions at Northwestern Polytechnical University, China, and COMSATS University Islamabad, Pakistan. His research spans software security, intrusion detection, and AI-driven threat analysis. He has supervised multiple research scholars, contributed to funded projects, and served as an editorial board member for prestigious journals. Beyond academia, Dr. Farhan is actively involved in international research collaborations, keynote speaking engagements, and professional training programs. His expertise in cybersecurity and AI continues to shape the future of secure and intelligent computing systems worldwide.
