Professor Dr. Kamran Mur

Professor of Data Science | AI & Big Data Expert | Rese

Department of Computer Sciences

BIO

Professor Dr. Kamran Munir is a leading expert in Data Science, Artificial Intelligence, and Big Data Analytics, currently serving as a Professor of Data Science at the University of the West of England, UK. With a distinguished career in academia and industry, he has successfully led multiple high-impact UK and international R&D projects in collaboration with organizations such as the British Council, Innovate UK, Airbus, and European Union-funded initiatives. His expertise spans large-scale data management, cloud computing, and AI-driven analytics, making him a pivotal figure in shaping the future of data-driven innovation. As a Principal Investigator and Project Manager, Professor Munir has secured and executed several funded research projects focused on real-time data analytics, smart agriculture, IoT-based predictive maintenance, and avionics big data applications. His leadership extends to supervising PhD and postgraduate students, fostering research excellence, and contributing to over 60 high-impact publications. Recognized for his outstanding research contributions, he has received multiple awards, including Researcher of the Year at the University of the West of England. He also plays a vital role in advisory and editorial boards, influencing global data science and AI research. His commitment to advance research and technological advancement continues to drive real-world impact in AI-powered data solutions.
