BIO

Mr. Usman Ali is a distinguished educator and researcher in the field of computer science. He completed his MSc in Computer Science from GC University and further advanced his expertise by earning an MS in Computer Science from Riphah International University, Islamabad. With over five years of teaching experience, Usman has developed a robust understanding of various computer science disciplines. His core competencies lie in Computer Architecture, Computer Networks & Security, Cryptography and Machine Learning. These areas are critical to the advancement of technology, and Usman's deep knowledge and practical insights make him an invaluable resource for his students and colleagues. In addition to his teaching responsibilities, Usman is an active researcher. He has numerous publications in well-known international journals, contributing significantly to the body of knowledge in his field. His research work not only enhances his teaching but also helps in addressing contemporary challenges in computer science. Usman Ali's dedication to education and research ensures that he remains at the forefront of technological advancements, continually contributing to the academic community and the development of innovative solutions in computer science.

Qualification

Education

- MSCS

(2020-2022)

Riphah International University, Islamabad
